- 29 Will you cover the Apple ecosystem and Canva?
- Yes! I'll be teaching workflows that apply whether you're using Apple, Android, or PC. There is a lot to explore in the world of Apple Photos, and I'll walk you through how to get the most out of it ... but I'll also provide guidance for other systems so no one feels left out. Canva will definitely be part of what we cover for design and layouts. The templates I'll share will be created in Canva, but you can use them directly in Canva or easily adapt the ideas to whatever program you prefer.
-
- 30 Do I need a second device to follow along during sessions?
- No, you don't need a second device. Most people simply join on their computer and, during the work time, make the Zoom window smaller so they can work on their project at the same time. If you do have a second device (like a tablet), you can use it, but it's completely optional.
-
- 31 Do I need a fast computer or lots of storage?
- No, most modern computers, tablets, and smartphones are more than enough for creating photo books. I'll also show you simple ways to organize and manage your photos so you don't feel overwhelmed by storage issues.
-
- 32 Will I need to buy extra software?
- No, you won't need to buy anything extra to participate. Online design sites are free to use, and the workflows we cover can be applied to whatever program you already know and love.
-
- 33 Will you be part of the community?
- Absolutely! I'll be active in the Studio community right alongside you. I'll be there to answer questions, cheer you on, share resources, and keep you moving forward. This isn't a self-serve program ... you'll have direct access to me during our live sessions and in the community space throughout the month.
